FTDI Document No.: FT_000141

29th May, 2009

Product Life Cycle Policy

The normal product life cycle of FTDI`s microchips is in excess of 5 years. When it comes to end of life FTDI will follow the FTDI End of Life Policy (FTDI document No: FT_000142).

A reduced product life cycle may occur if the technology or processes used in the manufacture of a particular device becomes redundant at the semiconductor foundry. In this exceptional case FTDI will analyse the market potential to determine if there is a case to develop a compatible replacement product.

This Product Life Cycle Policy supersedes any previous FTDI Product Life Cycle Policy as of the date of release indicated above.

On behalf of Future Technology Devices International Ltd,

A handwritten signature in black ink that reads 'Fred Dart.' The signature is written in a cursive, slightly slanted style.

Fred Dart, Managing Director
Future Technology Devices International Ltd.
